PM- 11/22-11/24
- * Fall Student Assessments sent home

2023

Four Year Old Class

Math

Now that we have learned about similarities and differences, we are ready to sort and classify materials. We will be practicing grouping and regrouping items. Classifying materials will help in understanding later math concepts like odd and even numbers and begin the foundation for other advanced math concepts.

Learning

Without Tears

This month we will finish learning straight line letters, T and I. We will also begin making curves with letter U.

We will continue using the hooked on phonics program at our listening center to reinforce each letter of the week.

Practice name sheets will also be done weekly.
